AMPIN Energy Transition

AMPIN Energy Transition on Monday announced the signing of a long-term renewable Power Purchase Agreement (PPA) with Air Liquide in India for supply of 6.6 MW of renewable energy from its wind-solar hybrid project. Once operational, the project is expected to offset 60 per cent of the site's electricity requirements through renewable energy, enabling the abatement of approximately 22,000 tonnes of CO2 emissions per year, a company statement said.
